

Glib Omelnytskyi

Unity Developer

PROFESSIONAL SUMMARY

Unity Developer with 4+ years of commercial experience developing and shipping mobile games (casual, hybrid-casual, hyper-casual) and PC projects. Experienced in gameplay architecture, UI systems, performance optimization, SDKs integrations, and live production support. Worked on projects with 15M+ total downloads, improving stability, monetization, and build performance. Skilled in building scalable systems, debugging production issues, and collaborating in cross-functional teams.

SKILLS

Architecture & Systems: Unity 2D/3D, C#, OOP, SOLID, ScriptableObjects, Object Pooling, client-server systems;

Tools: DI (Zenject, VContainer), Addressables, TextMeshPro, Localization, Timeline, LogCat, UniTask, DOTween, SoundBank, Editor and Inspector Tools, LINQ;

SDKs: Firebase, IronSource, AppLovin MAX, AdMob, IAP, InMobi, Infatica, Meta;

Optimization: Profiler, Build Size Reduction, Frame Debugger;

Additional: Git, CI/CD, Jira, Asana, Figma, Blender, Photoshop.

EXPERIENCE

Unity developer | August 2025 – now |

Freelance

- Prepared and optimized 3D assets for a VR application;
- Implemented a remote-configurable setuping visual theme (cartoon, dark, mechanical);

Projects based Unity Developer | June 2024 - Feb 2025 |

DadGames

- Engineered gameplay architecture for 5+ hyper-casual mobile games, one mid-core game, and a PC project;
- Integrated and resolved conflicts in 10+ SDKs;
- Implemented AppLovin MAX and IronSource mediation with remote runtime switching support;
- Reduced initial loading time by 35% (40s → 26s) and optimized runtime performance;
- Reduced build size by 15%;
- Created shaders;
- Developed internal tools and custom editor extensions for automated and testing;
- Published games on Google Play;
- Lead of animator, artist;

Contract Unity Developer | December 2023 - April 2024 |

Enixan Entertainment

- Developed and maintain 2 casual games;
- Added a battlepass system;
- Worked on unit system: animations, logic and data;
- Made complex and flexible UI systems;
- Improved stability of the client-server saving system;
- Implemented localization workflows;
- Extended building and crafting features.

Unity Developer | November 2020 - October 2023 |

AlphaNova/Murka

- Developed 5+ mobile casual games with a combined 15M+ downloads on Google Play;
- Integrated and maintained ads monetization and analytics systems using AppLovin MAX and custom analytics solution;
- Automating localization (created an internal tool for extracting text from prefabs and scenes).;
- Reduced build size with addressables;
- Work on gameplay features;
- Diagnosed and fixed production bugs, improving overall stability;
- Maintained and shared submodules;
- Implemented and optimized in-game audio systems for mobile devices;

EDUCATION

Oles Honchar Dnipro National University, Faculty of Applied Math, Specialty: software engineering

- 2018 - 2020 Master`s degree;
- 2014 - 2018 Bachelor`s degree;

Courses:

- GameDevGuru "Optimization"
- LevelUp "SQL"
- Syndicate "Unity development"

ACHIEVEMENTS

1. Reduced application startup time by 35% (40s → 26s) by optimizing references, resource loading, and initialization workflows.
2. Improved user ratings on Google Play from 3.8 to 4.4 by fixing production bugs, stabilizing, and optimizing client-server communication.
3. Created internal tools and custom editor extensions to speed up development:
 - a) a localization tool that extracts all text from UI components (prefabs and scenes) into a spreadsheet;
 - b) a designer tool that synchronizes configs with data from binary files (and vice versa).
4. Identified and fixed an issue in a SDK's native Android Java codecode (.aar) importing from Android Studio.
5. Developed a multiplayer [pet project](#) using the Mirror networking framework and client-server architecture.
6. Optimized word set generation algorithm for a crossword game, improving generation speed.
